Comprised of two semesters, each with 13 weeks of instruction plus six days of examinations; a 5-week winter session and two 5-week summer sessions. The unit of credit is the semester credit hour which is generally based on one period (50 minutes of lecture, laboratory or quiz recitation per week per semester). For shorter sessions the length of the period and/or number of sessions per week is increased to afford instructional time comparable to that in a regular semester.
